avantri

we engineer technically superior
next gen software for your needs

We provide software services in
prototyping, specifying, building and
integrating next-generation
software solutions. Our expertise in
following fields provides a
competitive advantage in delivering
perfectly crafted software with the
highest build stability

WHAT WE DO?

01

Product Engineering

Engineering high quality products for early-stage and mid-stage startups and enterprises, and consulting on scaling

02

Enterprise Solutions

Building solutions powered with AI/ML and Blockchain technologies for the enterprises

our solutions

PRODUCT ENGINEERING

Design

Delivering bespoke, unique UI designs that are crafted with UX psychology in mind. Designs are designated to stand out from your market competition

Development

Materializing systems with highest quality and stability, making the output futureproof even at the MVP stages.

Maintenance

Dedicating long term consultancy and guidance for scaling the product to meet the demands of a growing user base.

Highroad Delivery

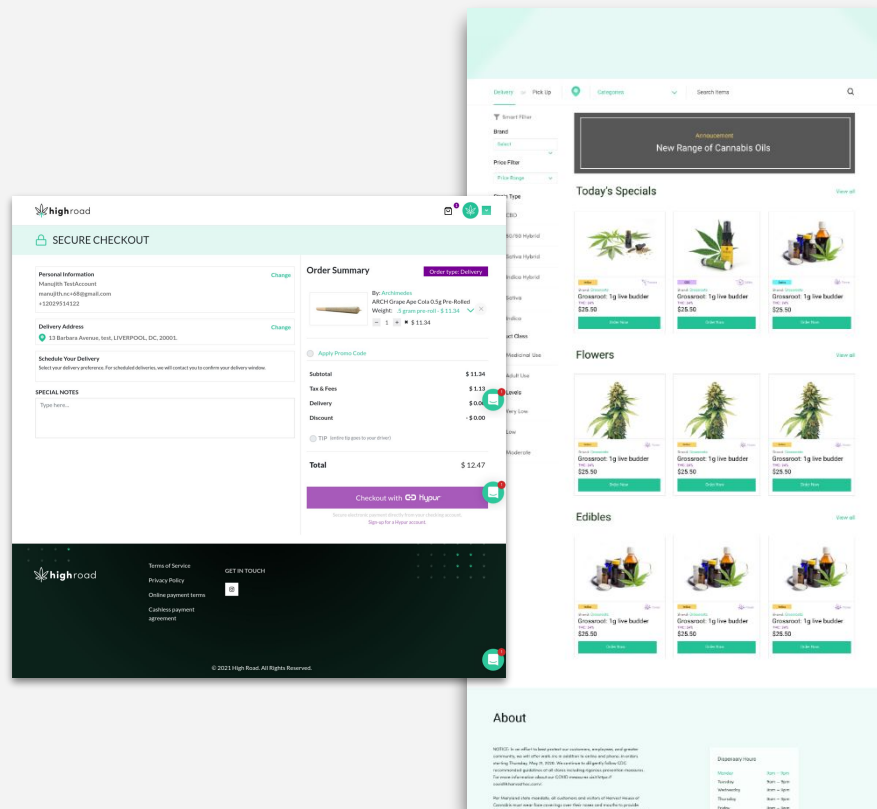

Highroad Delivery is a US based startup that provides e-commerce visibility and solves the last mile problem for medical cannabis dispensaries. Cannabis is becoming one of the fastest growing markets in the world grossing over USD 100 Billion in 2021. Cannabis tech has grown to support the exponentially growing demand.

Highroad Delivery partnered with us through FinDigital - our partnering digital agency, to revamp their delivery service platform to be scalable and future-proof. In a span of 3 months, we developed a brand new multi-vendor ecommerce engine to upgrade their entire platform. Today Highroad is functioning in 4 states, processing a substantial order pipeline daily.

- 7. QCQC regulated**: QCQC regulated.
- 8. NHS medical records**: NHS medical records.

PRICINGS

GP Services

The GP Service is a UK based startup that provides online GP consultation services. With over 6000 pharmacies on board, GPS is steadily becoming a household name in the healthcare industry. Services by GPS include video based GP consultations, online form based treatments, and online travel health assessment.

GPS platform is trusted by major brands including Superdrug and Cooperative Pharmacy. We are the proud technical services provider for GPS, leading development and maintenance of the platform, taking the burden of day-to-day technical aspects away from them.

INTRODUCING SAAS FOR CONSTRUCTION ESTIMATES

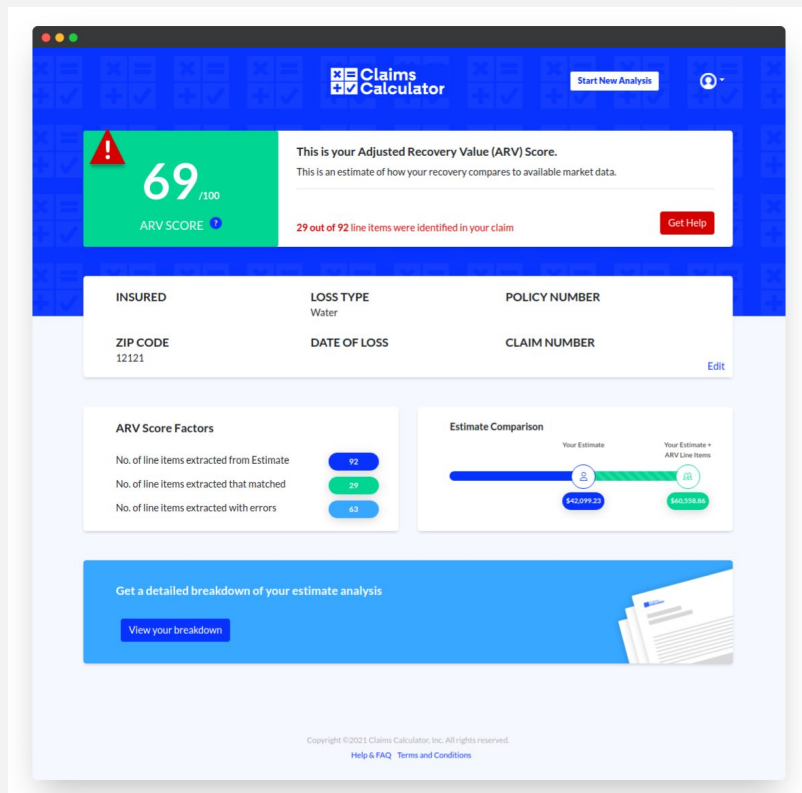

The screenshot displays the GetJobFlow SaaS dashboard, which is divided into several sections:

- Dashboard:** Features a search bar, a map of the United States with location markers, and a sidebar with navigation options: Dashboard, Projects, Line Items, Users, Offices, and Log Out.
- Estimate Management:** Includes a table for estimating projects with columns for Name, Rate, Quantity, Tax, Total, and Unit. It also has buttons for adding and importing line items.
- Invoice Details:** Shows a form for creating invoices, including fields for Project Title, End date, and a summary of the invoice total.
- Summary Details:** Provides a breakdown of the invoice total, including SubTotal, Taxes, Discount, and the final Total.

Name	Rate	Quantity	Tax	Total	Unit
Lumber	\$ 15.00	250	0%	\$ 3750.00	Linear Foot
Lumber	\$ 15.00	11	0%	\$ 165.00	Linear Foot
Drywall	\$ 1.00	2	0%	\$ 2.00	Pound

Summary Details	
SubTotal	\$ 3917.00
Taxes	\$ 0.00
Discount	\$ 200.00
Total	\$ 3717.00

POWERING AUTOMATED CLAIM ADJUSTMENT WITH AI

Claims Calculator

The US based product Claims Calculator provides a SaaS model for claim adjustments, to provide potential gains that can be declared according to industry standards. A predominantly human oriented task, that is fully automated and provided as a subscription service.

The solution was a challenging piece of engineering where computation heavy text recognition and ML based classifier models were made to run in near real-time, while hiding the technicalities from the end user. After several iterations, Claims Calculator now functions just as good (or better) as a human agent.

Advantis AMAT

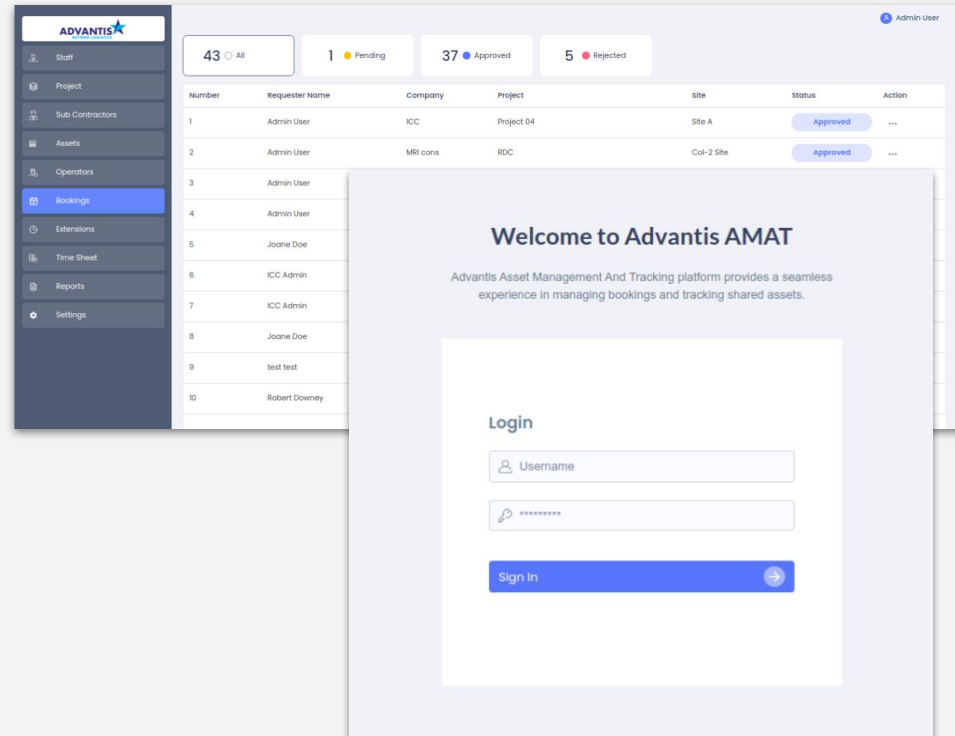

Advantis Projects, the largest logistics provider in Sri Lanka - is a subsidiary of the Hayleys Group. Functioning as an industry giant for over 50 years, Advantis Projects has accumulated a wealth of industry processes that are now being digitized as automations.

Advantis partnered with us to create AMAT - an asset management and utilization tracking tool, to be used centrally as the core for managing their asset fleet. The platform offers a wide range of features including asset management, asset booking, and real-time asset utilization tracking. The platform is to be used inaugural to manage the Sri Lankan national airport expansion project.

FLEET BOOKING MANAGEMENT FOR SRI LANKA'S LARGEST LOGISTICS PROVIDER

ENABLING TERM DEPOSITS FOR CRYPTO CURRENCIES

HODL VAULT

Blockchain based consumer solutions has been a key part of our value additions since the inception. Using the expert input from our partners at Avantrio, we have been delivering solutions that utilize blockchain based integrations using multiple chains - primarily in Ethereum.

HODL Vault provides an incentivized storage for the impatient token holders enabling the "hodling" process in the highly volatile crypto market. The smart contract we developed for HODL managed storing tokens as well as calculating a fixed interest as an investive for keeping the funds stored in a given period. It also penalizes early withdrawals, creating a perfectly democratic mini-bank solution. HODL also powers its own token.

ENTERPRISE SOLUTIONS

Blockchain solutions

Creating value addition by designing fully trustless systems to introduce traceability, and transparency for business processes.

Tailor made ML solutions

Bringing your concept to a viable model should be a hassle free process. We are equipped to provide an end to end solution that would push your idea from concept to prototype to profits!

ABOUT US

Started in 2018 as a boutique dev studio, Avantrio has grown exponentially during the last 3 years. Accumulating clients and trusted partnerships from all over the globe.

Incepted as a enterprise solutions provider in AI and Blockchain, we later diversified into product engineering under the brand name Verstead. Verstead has been successfully helping over 10 different early and mid stage startups to bring their products to the market providing continued consultancy in the scaling stages.

Our building blocks are in engineering and quality craftsmanship, ensuring unique and personal touch into every product created.
